

SAVE TIME. GROW PROFIT.

CargoWise[®] E2E Integration

INTEGRATE WITH ITG AND START SAVING

Minutes of set up. Hours of time savings.

Integration Benefits

Order Acknowledgment

Place orders directly in CargoWise. No more waiting to hear back on whether an order has been received. You'll be notified instantly and we'll get to work.

Shipment Status

If we know it, you'll know it. Automatic updates to milestones eliminates the need for calls and emails asking for updates on shipments in progress. Shared data between our systems eliminates the need for repeated data entry and reduces the likelihood of errors. Tracking milestones has never been easier.

Proof of Delivery

Chasing down carriers is a hassle you don't need. We do that legwork and the PODs are added electronically to your company's eDocs.

Integration Saves Time and Money

A CargoWise E2E integration lets your team focus on the big picture instead of tracking the details of first/last mile moves. Follow-up and data entry are handled by ITG and updates are shared automatically. Streamlined communication, error reduction, and less busywork mean your team can **handle more shipments with greater profitability.**

Integration is Easy

The word "integration" sounds like a big time-consuming IT project. Don't worry, it's not. Typically, an integration with ITG can be set up in less than an hour and requires no involvement from CargoWise or WiseTech Global. The savings provided by the integration will recoup that time in the first few days alone.

We Can Help with Your Integration

We can supply detailed instructions on how to configure your CargoWise system for integration. Even better, with a 30-minute screen share meeting, we can walk you through the process and have you up and running.
